SL No 28

We have planned to conduct value added course on "Mastering the Art of Coding" to our II Year CSE & ADS students in four batches through external trainer from industries during 12/02/2024 to 17/02/2024.

Batch II details:

Number of Students : 60 approximately.

Name of the training industry offering the course: HRLytics

Contact Person : Kayalvizhi

With Phone Number : 7094694226

Number of days : 6

Total number of hours : 45

Fees per student : Rs 1800 (Inclusive of Tax)/student

Approval may please be provided to conduct the

Course and to sanction the training fees.

Additional Requirements : Refreshment, lunch and accommodation be provided to the Resource Persons from our college.

Enclosure/Quotation.

VALUE ADDED COURSES

Circular

The Department of Computer Science and Engineering is planned to organize the following value added courses associated with the industries for Second year B.E. CSE and B.Tech ADS during 12-02-2024 to 17-02-2024.

Objective:

- To build technical skill of the students

Course Outcome:

- Able to enhance the technical knowledge through which the students will fine-tune their career prospect, improve preparedness for campus placement and gain competitive edge

The following course are planned to be conducted.

S.No	Date	Name of course
1	12-02-2024 to 17-02-2024	Mastering the Art of Coding Batch I - Java Programming
2	12-02-2024 to 17-02-2024	Mastering the Art of Coding Batch II - Java Programming
3	12-02-2024 to 17-02-2024	Mastering the Art of Coding Batch III - Advanced C Programming
4	12-02-2024 to 17-02-2024	Mastering the Art of Coding Batch IV - Fundamentals of C Programming
5	12-02-2024 to 17-02-2024	Mastering the Art of Coding Batch V - Fundamentals of C Programming

Department of Computer Science and Engineering

VALUE ADDED COURSES - Minutes

Value Added Courses are very important to bridge the gap between the academic and industry needs. These courses which help a particular individual to develop their own skills in their chosen field of the study are conducted by professionals and industry experts. They help students stand apart from the rest in the job market by adding further value to their resume.

A meeting was conducted on 22-01-2024 at 10:30am in the Department Office to discuss the various points about Value Added Courses.

I. Members present:

1. Dr A Meenakshi, Head & Professor
2. Value Added Course Co-ordinators
 - a. Dr G Nirmala, AP-CSE
 - b. Dr G Uma Maheswari AP-CSE
3. Three Member Committee
 - a. Dr R Muthuselvi Prof-CSE
 - b. Dr P Praveen Kumar AP-CSE
 - c. Dr G Nirmala AP-CSE

II. Agenda

1. Guide lines for Value Added Courses (VAC)
2. Faculty members' domain of interest and Students' options
3. Identification of Value Added Courses and Trainers from Industries

III. Minutes

1. Guidelines of VAC are discussed.

- The students may optionally undergo value added courses offered by experts from industry / other institutions (Academic / Research) / institution faculty on specialized topics
- Every 15 period course will be given 1 credit
- If the value added course is a theory, then the contact hours in a day shall not exceed four periods
- The courses shall be conducted without affecting the regular academic schedule
- Candidates can complete such courses during 3rd to 8th semesters as and when these courses are offered by departments

- A candidate will also be permitted to register such course offered by other departments.
- The Department / Course in-charge / Faculty / Expert concerned shall conduct one assessment at the end of the course
- The Head of the Department shall form a committee to monitor the progress of the course.
- Candidates can take a maximum of two one-credit courses / one two- credit course during an academic year if offered.
- Credits earned under this category will be over and above the total credit requirement as prescribed in the Employability Enhancement Courses category excluding the actual credits required for project works.

2. Faculty members' Domain of interest and Students options are obtained.

- The information about the courses was given to the students to know their interest in developing their programming skills and a form was generated to receive their responses about Java programming and C programming
- The faculty coordinators are nominated for each course in accordance to their interest shown. The list is shown as follows:
 - Mastering the Art of Coding Batch I Co-ordinators
Mr M Rajavelaran, Ms D Pradhba & Mr B Muthukrishna Vinayagam
 - Mastering the Art of Coding Batch II Co-ordinators
Mr V Rajeshkannan, Mr R Kumaravel & Mr G Praveen Kumar
 - Mastering the Art of Coding Batch III Co-ordinators
Ms S Nithya, Mr R Haripriya, Mr D Raj & Mrs E Vijayalakshmi
 - Mastering the Art of Coding Batch IV Co-ordinators
Mr S Janani & Mrs K Muthhlakshmi
 - Mastering the Art of Coding Batch V Co-ordinators
Dr G Nirmala & Dr G Uma Maheswari

3. Value Added Courses and Industries are identified.

The following industries are identified to conduct the courses

S.No	Courses to be offered	Name of the company	Resource Persons
1	Mastering the Art of Coding Batch I - Java Programming	Amplisoft Technologies, Combatoore	Mr Murali, Product Developer & Corporate Trainer Mr Ahs Petreca, Technical Specialist & Corporate Trainer
2	Mastering the Art of Coding Batch II - Java Programming	HRI ytics Private Ltd, Bengaluru, Karnataka	Mr S Savadhatan, Trainer Mr Muthaiah, Trainer

3	Mastering the Art of Coding Batch III – Advanced C Programming	CodeTantra Tech Solutions Private Limited, Hyderabad	Mr. D Murahari Reddy, Technical Trainer Mr. P Gargheya Mani Sampath, Technical Assistant
4	Mastering the Art of Coding Batch IV – Fundamentals of C Programming	Xplocode Infotech Pvt Ltd, Madurai.	Ms. G. Mahima, Director and Trainer Ms. V. Ponamalar, Director and Trainer
5	Mastering the Art of Coding Batch V- Fundamentals of C Programming	Phoenix Softech, Madurai.	Mr. A.M. Sasi Kumar

S.No	Name of the course	Venue	Number of Students Attending	Class	Date
1	Mastering the Art of Coding Batch I – Java Programming	Programming Lab	60	II CSE & ADS	12-02-24 to 17-02-24
2	Mastering the Art of Coding Batch II- Java Programming	Visual Computing Lab & Cloud Computing Lab	60		
3	Mastering the Art of Coding Batch III – Advanced C Programming	Network Security Lab	62		
4	Mastering the Art of Coding Batch IV – Fundamentals of C Programming	Mobile Application Development Lab	32		
5	Mastering the Art of Coding Batch V- Fundamentals of C Programming	Information Systems Lab	31

Department of Computer Science and Engineering

Value Added Course on “Mastering the Art of Coding – Java Programming”

(12.02.2024 – 17.02.2024)

Trainer’s Name : Mr.S.Sasidharan,HRLytics Private Limited,Bangalore.
Mr.S.Mukunthan , HRLytics Private Limited,Bangalore.

Course Objectives:

- To understand the basics of Java programming language.
- To learn the concepts of classes and objects
- To learn the basic of inheritance and interfaces in Java
- To Construct a simple generic function in Java
- To understand basics of the multithreading and exception handling mechanism

UNIT 1 Foundations of Java Programming: 9

Introduction to Java: Basic Features of - Data Types - Variables and Constants - Expressions and Operators - Type Casting - Conditional Statements - Looping Constructs - Input and Output Statements - Arrays in Java - Functions in Java - String Basics and Operations - Wrapper Classes - Concept of Boxing and Unboxing

UNIT 2 INTRODUCTION TO OBJECT-ORIENTED PRINCIPLES: 9

Classes and Objects in Java - Data Encapsulation and Static Keyword: Constructors - Static and Final Keywords - Inheritance and its Code Implementation – Polymorphism - Abstract Class and its Implementation in Java

UNIT 3 JAVA STANDARD LIBRARIES: COLLECTIONS 9

Introduction to Generics and Collections API - Importance and Need of Collections - Various Collection Classes and Hierarchy - API Methods in Collection Classes - Comparator and Comparable Interfaces

UNIT 4 JAVA STANDARD LIBRARIES: GENERICS 9

Understanding Generics in Java - Generics and its Role in Collection Classes - Exploring Generic Types - Wildcards in Generics - Use cases and Benefits of Generics - Limitations and Best Practices

UNIT 5 MULTITHREADING,EXCEPTION HANDLING: 9

Multithreading-Creation of single thread-Creation of multi thread- Thread lifecycle-Thread synchronization- Interprocess communication-Introduction to Exception –Types of Exceptions - Class Hierarchy of Exceptions and Errors - Hands-on Practice: Common Exception Handling Techniques.

Course outcomes:

By the end of the course, the student will be able to:

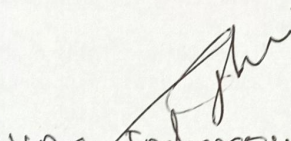

- CO1 Understand basic constructs of the Java language
- CO2 Understand the basic principle of object oriented programming concepts
- CO3 Demonstrate inheritance and interfaces in Java
- CO4 Apply the concepts of collections and generics to write simple real world applications.
- CO5 Build simple Java applications using threads and exception handling

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Value Added Course – Even Semester (2023- 24)

Course Name: JAVA PROGRAMMING

Duration: 6 days (45 Hours)

MASTERING THE ART OF CODING-JAVA PROGRAMMING

12-02-2024-17-02-2024

No.of Students:60

Resouce Person:Mr.S.Sasidharan

Year:II CSE-A,B,C &ADS

Regulation:2021

Course Objectives:

The objective of the course is to:

- Understand the basics of Java programming language.
- Learn the concepts of classes and objects
- Learn the basic of inheritance and interfaces in Java
- To Construct a simple generic function in Java
- To understand basics of the multithreading and exception handling mechanism

Day 1: Foundations of Java Programming

1. Basic Concepts:

- Basics of Java
- Operators
- Variables
- Conditional Statements
- Looping
- Arrays

Day 2: Introduction to object-Oriented Principles

1.CLASSES AND OBJECTS

- Strings
- Defining Classes
- Objects
- Methods
- Constructors.

2.Absraction and Encapsulation

Day 3: Inheritance , Interface and Inner Class

- Inheritance
- Superclasses
- Subclasses
- Types of Inheritance
- Abstract classes and methods
- Final classes and methods
- Interfaces.
- Inner classes

Day 4: Collections and Generic Method

1. Introduction to Generics and Collections API
 - Importance and Need of Collections
 - Various Collection Classes and Hierarchy.
 - Comparator and Comparable Interface
 - API Methods in Collection Classes

Day 5: Collections and Generic Method

1. Understanding Generics in Java
 - Generics and its Role in Collection Classes
 - Exploring Generic Types
2. Generic Programming
 - Generic Class - Wildcards in Generics
 - Generic Methods- Applications
 - Use cases and Benefits of Generics

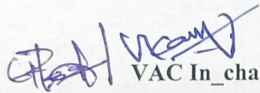

Day 6: Multithreading and exception Handling.

1. Multithreading
 - Creation of single thread
 - Creation of multi thread
 - Thread Life Cycle
 - Thread Synchronization
 - Inter process communication.
2. Exception Handling.
 - Introduction to Exception
 - Class Hierarchy of Exceptions and Errors.
 - Creation of Exception using try and catch block

Course outcomes:

By the end of the course, the student will be able to:

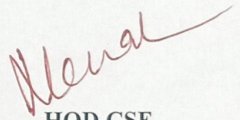

- CO1 Understand basic constructs of the Java language
- CO2 Understand the basic principle of object oriented programming concepts
- CO3 Demonstrate inheritance and interfaces in Java
- CO4 Apply the concepts of collections and generics to write simple real world applications.
- CO5 Build simple Java applications using threads and generic class

VALUE ADDED COURSES 2023-2024 (12-02-2024 to 17-02-2024)

Date and Time of VAC Exam Conducted

S.No	Name of the course	Date and Time of the exam conducted	Class
1	Mastering the Art of Coding Batch I - Java Programming	17-02-24 / 6 00 to 7 30 PM	II CSE & ADS
2	Mastering the Art of Coding Batch II - Java Programming	17-02-24 / 6 00 to 7 30 PM	
3	Mastering the Art of Coding Batch III - Advanced C Programming	17-02-24 / 6.00 to 7 30 PM	
4	Mastering the Art of Coding Batch IV - Fundamentals of C Programming	17-02-24 / 6 00 to 7.30 PM	
5	Mastering the Art of Coding Batch V - Fundamentals of C Programming	17-02-24 / 6 00 to 7 30 PM

🕒 120 minutes

MASTERING THE ART OF CODING - JAVA PROGRAMMING (EXTERNAL ASSESSMENT)

* Required

* This form will record your name, please fill your name.

1. Enter Your Roll Number *

2. Enter Your Register Number *

3. Enter Your Name *

4. Choose Your Department *

- IIA-CSE
- IIB-CSE
- IIC-CSE
- II-ADS

5. Which of the following are legal lines of Java code?

i. `int w = (int)888.8;`

ii. `byte x = (byte)100L;`

iii. `long y = (byte)100;`

iv. `byte z = (byte)100L;` * (1 Point)

- 1 and 2
- 2 and 3
- 3 and 4
- All statements are correct

6. What is the output of the following program?

```
List<String> names = Arrays.asList("ABC", "CAB", "BCA");
```

```
String result = names.stream\(\).reduce("", (a, b) -> a + b.charAt(1));  
System.out.println(result); * (1 Point)
```

"ABC"

"ACB"

"BAC"

"CBA"

7. Which statement is true about Java? * (1 Point)

Java is a sequence-dependent programming language

Java is a code dependent programming language

Java is a platform-dependent programming language

Java is a platform-independent programming language

8. What is the purpose of the finally block in a Java try-catch-finally construct? * (1 Point)

- To catch and handle exceptions thrown in the try block
- To execute code regardless of whether an exception is thrown or not
- To define the conditions for handling exceptions
- To provide an alternate code path when an exception occurs

9. Which of these is an incorrect array declaration? * (1 Point)

- `int arr[] = new int[5]`
- `int [] arr = new int[5]`
- `int arr[] = new int[5]`
- `int arr[] = int [5] new`

10. Which Scanner class method is used to read String value? * (1 Point)

- `nextLine()`
- `next()`
- `readString()`
- Both a & b

11. Which method can be defined only once in a program? * (1 Point)

- main method
- finalize method
- static method
- private method

12. Which of the following modifier means a particular variable cannot be accessed within the package? * (1 Point)

- private
- public
- protected
- default

13. How many copies of static and class variables are created when 10 objects are created of a class? * (1 Point)

- 1, 10
- 10, 10
- 10, 1
- 1, 1

14. Using which of the following, multiple inheritance in Java can be implemented? * (1 Point)

- Interfaces
- Multithreading
- Protected methods
- Private methods

15. **Abstract methods of abstract classes are mandatory to be overridden by sub classes. Is that true?** * (1 Point)

- Yes
- No

16. Which of these packages contains abstract keyword? * (1 Point)

- java.lang
- java.util
- [java.io](#)
- java.system

17. Which concept of Java is a way of converting real world objects in terms of class? * (1 Point)

- Polymorphism
- Encapsulation
- Abstraction
- Inheritance

18. Predict the output of following Java program

```
class Test {  
    int i;  
}  
class Main {  
    public static void main(String args[]) {  
        Test t = new Test();  
        System.out.println(t.i);  
    }  
} * (1 Point)
```

- garbage value
- 0
- compiler error
- runtime error

19. Which of the following is the correct way of implementing an interface A by class B? * (1 Point)

- class B extends A{}
- class B implements A{}
- class B imports A{}
- None of the mentioned

20. What is the output of the following code snippet?

```
int i = 0;
while (i < 3) {
    System.out.print(i + " ");
    i++;
} * (1 Point)
```

- 0 1 2
- 1 2 3
- 0 1 2 3
- Infinite loop

21. Predict the output of following Java program.

```
class Test {  
    public static void main(String[] args) {  
        for(int i = 0; 0; i++)  
        {  
            System.out.println("Hello");  
  
            break;  
        }  
    }  
} * (1 Point)
```

- Hello
- Empty Output
- Compiler error
- Runtime error

22. What is Collection in Java? * (1 Point)

- A group of objects
- A group of classes
- A group of interfaces
- None of the mentioned

23. Can we call static methods using this from non static methods? *

(1 Point)

Yes

No

24. Which of the following is/are advantages of packages? * (1 Point)

Packages avoid name clashes

Classes, even though they are visible outside their package, can have fields visible to packages only

We can have hidden classes that are used by the packages, but not visible outside.

All of the above

25. Consider the following class definition: `public class MyClass { private int value; public void setValue(int i){ / code / } // Other methods... }`
The method `setValue` assigns the value of `i` to the instance field `value`.
What could you write for the implementation of `setValue`? * (1 Point)

`this.value = i;`

`value == i;`

`value = i;`

Both 1 & 3

26. What will be printed as the output of the following program? `public class testincr { public static void main(String args[]) { int i = 0; i = i++ + i; System.out.println("I = " +i); } }` * (1 Point)

- I=1
- I=2
- Error
- I=0

27. Which of the following is used to find and fix bugs in the program? * (1 Point)

- JDK
- JRE
- JVM
- JDB

28. When is the object created with new keyword? * (1 Point)

- At run time
- At compile time
- Depends on the code
- None

29. Which is a valid declaration within an interface? * (1 Point)

- public static short stop = 23;
- protected short stop = 23;
- transient short stop = 23;
- final void madness(short stop);

30. Output of Math.floor(3.6)? * (1 Point)

- 3
- 3.0
- 4
- 4.0

31. Which of the following statements is/are TRUE regarding JAVA ?

- a. Constants that cannot be changed are declared using the 'static' keyword.
- b. A class can only inherit one class but can implement multiple interfaces. * (1 Point)

- Only (a) is TRUE.
- Only (b) is TRUE.
- Both (a) and (b) are TRUE.
- Neither (a) nor (b) are TRUE.

32. The default constructor is used for * (1 Point)

- Calling default methods
- Intializing default values to objects
- Deferencing default objects
- All of above

33. Which of these keywords must be used to handle the exception thrown by try block in some rational manner? * (1 Point)

- try
- finally
- throw
- catch

34. Which of the following interface is not a functional interface? * (1 Point)

- An interface with a single abstract method
- An interface with an abstract method and a default method
- An interface with an abstract method and an equals() method
- An interface with an abstract method and a run() method

35. What will be the output of the following Java code?

```
class area {  
    public static void main(String args[])  
    {  
        double r, pi, a;  
        r = 9.8;  
        pi = 3.14;  
        a = pi * r * r;  
        System.out.println(a);  
    }  
}
```

* (2 Points)

- 301.5656
- 301
- 301.56
- 301.56560000

36. What will be the output of the following Java code?

```
class char_increment
{
    public static void main(String args[])
    {
        char c1 = 'D';
        char c2 = 84;
        c2++;
        c1++;
        System.out.println(c1 + " " + c2);
    }
}
```

* (2 Points)

E U

U E

V E

U F

37. What will be the output?

```
public class Test{  
    public static void main(String[] args){  
        int[] x = new int[3];  
        System.out.println("x[0] is " + x[0]);  
    }  
}
```

* (2 Points)

- The program has a compile error because the size of the array wasn't specified when declaring the array.
- The program has a runtime error because the array elements are not initialized.
- The program runs fine and displays x[0] is 0.
- The program has a runtime error because the array element x[0] is not defined.

38. What will be the output of the following Java program?

```
class equality
{
    int x;
    int y;
    boolean isequal()
    {
        return(x == y);
    }
}
class Output
{
    public static void main(String args[])
    {
        equality obj = new equality();
        obj.x = 5;
        obj.y = 5;
        System.out.println(obj.isequal());
    }
}
```

* (2 Points)

false

true

0

1

39. What will be the output of the following Java program?

```
class recursion
{
    int func (int n)
    {
        int result;
        if (n == 1)
            return 1;
        result = func (n - 1);
        return result;
    }
}
class Output
{
    public static void main(String args[])
    {
        recursion obj = new recursion() ;
        System.out.print(obj.func(5));
    }
}
```

* (2 Points)

- 0
- 1
- 120
- None of the mentioned

40. What will be the output of the following Java program?

```
final class A
{
    int i;
}
class B extends A
{
    int j;
    System.out.println(j + " " + i);
}
class inheritance
{
    public static void main(String args[])
    {
        B obj = new B();
        obj.display();
    }
}
```

* (2 Points)

- 2 2
- 3 3
- Runtime Error
- Compilation Error

41. What will be the output of the following Java code?

```
class A
{ int i;
  void display()
  { System.out.println(i);
  } }
class B extends A
{
  int j;
  void display()
  {
    System.out.println(j);
  }
}
class method_overriding
{
  public static void main(String args[])
  {
    B obj = new B();
    obj.i=1;
    obj.j=2;
    obj.display();
  } }
```

* (2 Points)

- 0
- 1
- 2
- Compilation Error

42. What will be the output of the following Java code?

```
class output
{
public static void main(String args[])
{
StringBuffer s1 = new StringBuffer("Hello");
s1.setCharAt(1,'x');
System.out.println(s1);
}
}
```

* (2 Points)

- xello
- xxxxx
- Hxlllo
- Hexlo

43. What will be the output of the following Java program?

```
interface calculate
{
    void cal(int item);
}
class display implements calculate
{
    int x;
    public void cal(int item)
    {
        x = item * item;
    } }
public static void main(String args[])
{
    display arr = new display();
    arr.x = 0;
    arr.cal\(2\);
    System.out.print(arr.x);
} }
```

* (2 Points)

- 0
- 2
- 4
- None of the mentioned

44. What will be the output of the following Java program?

```
import java.util.*;
class Array
{
public static void main(String args[])
{
int array[] = new int [5];
for (int i = 5; i > 0; i--)
array[5-i] = i;
Arrays.fill(array, 1, 4, 8);
} }

```

45. What will be the output of the following Java program?

```
import java.util.*;

class ArrayList
{
    public static void main(String args[])
    {
        ArrayList obj = new ArrayList();
        obj.add("A");
        obj.add("B");
        obj.add("C");
        obj.add(1, "D");
        System.out.println(obj); } }
```

* (2 Points)

[A, B, C, D]

[A, D, B, C]

[A, D, C]

[A, B, C]

46. What will be the output of the following program?

```
public class Test2 {  
    public static void main(String[] args) {  
        StringBuffer s1 = new StringBuffer("Complete");  
        s1.setCharAt(1,'i');  
        s1.setCharAt(7,'d');  
        System.out.println(s1);  
    }  
}
```

7. Which statement is true about Java? *

- Java is a sequence-dependent programming language
- Java is a code dependent programming language
- Java is a platform-dependent programming language
- Java is a platform-independent programming language ✓

✓ **Correct** 1/1 Points

1 / 1 pt
Auto-graded

8. What is the purpose of the finally block in a Java try-catch-finally construct? *

- To catch and handle exceptions thrown in the try block
- To execute code regardless of whether an exception is thrown or not ✓
- To define the conditions for handling exceptions
- To provide an alternate code path when an exception occurs

✗ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

9. Which of these is an incorrect array declaration? *

- `int arr[] = new int[5]`
- `int [] arr = new int[5]`
- `int arr[] = new int[5]`
- `int arr[] = int [5] new` ✓

✘ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

10. Which Scanner class method is used to read String value? *

- nextLine()
- next()
- readString()
- Both a & b ✓

✘ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

11. Which method can be defined only once in a program? *

- main method ✓
- finalize method
- static method
- private method

✘ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

12. Which of the following modifier means a particular variable cannot be accessed within the package? *

- private ✓
- public
- protected
- default

✘ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

13. How many copies of static and class variables are created when 10 objects are created of a class? *

- 1, 10 ✓
- 10, 10
- 10, 1
- 1, 1

✗ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

14. Using which of the following, multiple inheritance in Java can be implemented? *

- Interfaces ✓
- Multithreading
- Protected methods
- Private methods

✓ **Correct** 1/1 Points

1 / 1 pt
Auto-graded

15. **Abstract methods of abstract classes are mandatory to be overridden by sub classes. Is that true? ***

- Yes ✓
- No

✘ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

16. Which of these packages contains abstract keyword? *

java.lang ✓

java.util

java.io

java.system

✘ **Incorrect** 0/1 Points

✗ Inc

33. W

31. Which of the following statements is/are TRUE regarding JAVA ?

- a. Constants that cannot be changed are declared using the 'static' keyword.
- b. A class can only inherit one class but can implement multiple interfaces. *

- Only (a) is TRUE.
- Only (b) is TRUE. ✓
- Both (a) and (b) are TRUE.
- Neither (a) nor (b) are TRUE.

✓ Correct 1/1 Points

1 / 1 pt
Auto-graded

32. The default constructor is used for *

- Calling default methods
- Initializing default values to objects ✓
- Deferencing default objects
- All of above

✘ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

33. Which of these keywords must be used to handle the exception thrown by try block in some rational manner? *

- try
- finally
- throw
- catch ✓

✘ **Incorrect** 0/1 Points

0 / 1 pt
Auto-graded

34. Which of the following interface is not a functional interface? *

- An interface with a single abstract method
- An interface with an abstract method and a default method
- An interface with an abstract method and an equals() method
- An interface with an abstract method and a run() method ✓

✗ **Incorrect** 0/2 Points

0 / 2 pts
Auto-graded

35. What will be the output of the following Java code?

```
class area {  
    public static void main(String args[])  
    {  
        double r, pi, a;  
        r = 9.8;  
        pi = 3.14;  
        a = pi * r * r;  
        System.out.println(a);  
    }  
}
```

- *
 301.5656 ✓
 301
 301.56
 301.56560000

✘ **Incorrect** 0/2 Points

0 / 2 pts
Auto-graded

36. What will be the output of the following Java code?

```
class char_increment
{
    public static void main(String args[])
    {
        char c1 = 'D';
        char c2 = 84;
        c2++;
        c1++;
        System.out.println(c1 + "" + c2);
    }
}
*
```

- EU ✓
- UE
- VE
- UF

✗ **Incorrect** 0/2 Points0 / 2 pts
Auto-graded

37. What will be the output?

```
public class Test{  
    public static void main(String[] args){  
        int[] x = new int[3];  
        System.out.println("x[0] is " + x[0]);  
    }  
}
```

- The program has a compile error because the size of the array wasn't specified when declaring the array.
- The program has a runtime error because the array elements are not initialized.
- The program runs fine and displays x[0] is 0. ✓
- The program has a runtime error because the array element x[0] is not defined.

31. Which of the following statements is/are TRUE regarding JAVA ? (1 point)

- Constants that cannot be changed are declared using the 'static' keyword.
- A class can only inherit one class but can implement multiple interfaces.

38% of respondents (23 of 60) answered this question correctly.

- Only (a) is TRUE. 6
- Only (b) is TRUE. 23 ✓
- Both (a) and (b) are TRUE. 30
- Neither (a) nor (b) are TRUE. 1

32. The default constructor is used for (1 point)

80% of respondents (48 of 60) answered this question correctly.

- Calling default methods 2
- Intializing default values to obje... 48 ✓
- Deferencing default objects 1
- All of above 9

33. Which of these keywords must be used to handle the exception thrown by try block in some rational manner? (1 point)

77% of respondents (46 of 60) answered this question correctly.

- try 3
- finally 6
- throw 5
- catch 46 ✓

34. Which of the following interface is not a functional interface? (1 point)
23% of respondents (14 of 60) answered this question correctly.

- An interface with a single abstra... 7
- An interface with an abstract me... 10
- An interface with an abstract me... 29
- An interface with an abstract me... 14 ✓

35. What will be the output of the following Java code? (2 points)

```
class area {  
    public static void main(String args[])  
    {  
        double r, pi, a;  
        r = 9.8;  
        pi = 3.14;  
        a = pi * r * r;  
        System.out.println(a);  
    }  
}
```

Question Name	Language	Submission Status	Pass Percentage
Artful Cleanup: Automating Text Corrections in Digital Portfolios			0.0
Tech Product Inventory Management - ArrayList Introduction			0.0
Factorial Calculation	Java	Accepted	100.0

1. Artful Cleanup: Automating Text Corrections in Digital Portfolios

Score: 0/27

Time Required: 10 mins

Time Taken: 29 secs

Alice has been working tirelessly on her digital portfolio for the upcoming art showcase, focusing on perfecting every detail. Unfortunately, during one of her editing sessions, a block of nonsensical text with some extra spaces at the beginning and end was mistakenly pasted into several of her project descriptions. Realizing the magnitude of manually sifting through each document to locate and eliminate this unwanted text, Alice sees an opportunity to employ her coding skills for a more efficient solution. She decides to write a program that can scan through each document to detect the presence of this misplaced text, thereby streamlining the cleanup process. Create a driver class named Main. Within the Main method, write code to read inputs from the console and determine whether the specified gibberish text is present in the document text. Remember to apply the contains () and trim () methods in your solution. **Input and Output Format:**

- The first line of input should be the text of the document.
- The second line of input should specify the string that needs to be searched for within the text.

Constraints: Ensure you use contains () for search functionality and trim () to remove any leading or trailing spaces from the gibberish text before the search. **Example**

Input and Output: **Sample Input and Output 1:** Enter the text from the document

During the late hours of the night, Alice meticulously worked on her digital artwork, unaware of the accidental paste error that occurred.

Enter the string to be found in the data

paste error

String is found in the document

Sample Input and Output 2: Enter the text from the document

During the late hours of the night, Alice meticulously worked on her digital artwork, unaware of the accidental paste error that occurred.

Enter the string to be found in the data

masterpiece

String is not found in the document

2. Tech Product Inventory Management - ArrayList Introduction

Score: 0/27

Time Required: 15 mins

Time Taken: 19 secs

In a tech product inventory management system, we need to efficiently store and manage information about various products. One of the basic data structures used for this purpose is the ArrayList. Let's explore the usage of ArrayList in this scenario. Create a class named Main to manage the tech product inventory. In the main method, prompt the user to input the names of tech products and store them in an ArrayList. After collecting all the names, display them in the same order they were entered.

Input and Output format: Refer to sample Input and Output for formatting specifications. **[All text in bold corresponds to the input, and the rest are output.]** **Sample**

Input and Output 1: Enter the product name 1:

Smartphone

Do you want to continue? (y/n)

y

Enter the product name 2:

Laptop

Do you want to continue? (y/n)

n

The product names entered are:

Smartphone

Laptop

Sample Input and Output 2: Enter the product name 1:

Bluetooth Speaker

Do you want to continue? (y/n)

y

Enter the product name 2:

Wireless Headphones

Do you want to continue? (y/n)

n

The product names entered are:

Bluetooth Speaker

Wireless Headphones

3. Factorial Calculation

Score: 27/27

Time Required: 10 mins

Time Taken: 7 mins 51 secs

Write a program to calculate the factorial of the given number.

Input Format:

Input consists of a single integer.

Output Format:

Output should display the factorial value of the given number.

Sample Input:

5

Sample Output:

120

Solution:

File 1:
/Main.java

```
import java.util.*;

class Main
{
    public static void main(String args[])
    {
        Scanner sc = new Scanner(System.in);
        int n;
        n = sc.nextInt();
        int fact = 1;
        for(int i = 1; i <= n; i++)
        {
            fact = fact*i;
        }
        System.out.println(fact);
    }
}
```

1. Artful Cleanup: Automating Text Corrections in Digital Portfolios

Score: 0/27

Time Required : 10 mins

Time Taken : 27 secs

Alice has been working tirelessly on her digital portfolio for the upcoming art showcase, focusing on perfecting every detail. Unfortunately, during one of her editing sessions, a block of nonsensical text with some extra spaces at the beginning and end was mistakenly pasted into several of her project descriptions. Realizing the magnitude of manually sifting through each document to locate and eliminate this unwanted text, Alice sees an opportunity to employ her coding skills for a more efficient solution. She decides to write a program that can scan through each document to detect the presence of this misplaced text, thereby streamlining the cleanup process. Create a driver class named Main. Within the Main method, write code to read inputs from the console and determine whether the specified gibberish text is present in the document text. Remember to apply the `contains()` and `trim()` methods in your solution. **Input and Output Format:**

- The first line of input should be the text of the document.
- The second line of input should specify the string that needs to be searched for within the text.

Constraints: Ensure you use `contains()` for search functionality and `trim()` to remove any leading or trailing spaces from the gibberish text before the search. **Example Input and Output:** **Sample Input and Output 1:** Enter the text from the document

During the late hours of the night, Alice meticulously worked on her digital artwork, unaware of the accidental paste error that occurred.

Enter the string to be found in the data

paste error

String is found in the document

Sample Input and Output 2: Enter the text from the document

3. Factorial Calculation

Score: 27/27

Time Required : 10 mins

Time Taken : 7 mins 51 secs

Write a program to calculate the factorial of the given number.

Input Format:

Input consists of a single integer.

Output Format:

Output should display the factorial value of the given number.

Sample Input:

5

Sample Output:

120

Solution:

File 1
/Main.java

```
import java.util.*;

class Main
{
    public static void main(String args[])
    {
        Scanner sc = new Scanner(System.in);
        int n;
        n = sc.nextInt();
        int fact = 1;
        for(int i = 1; i <= n; i++)
        {
            fact = fact*i;
        }
        System.out.println(fact);
    }
}
```

HOD CSE

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Value Added Course on

Mastering the Art of Coding - JAVA Programming

Batch II

Total Number of Students: 60

Date: 12-02-2024 to 17-02-2024

HRLytics, Bengaluru. Trainer Name: Mr.S.Sasidharan, Software Trainer

REPORT

The Department of Computer Science and Engineering, Kamaraj college of Engineering and Technology is conducted a Value Added Course on Mastering the Art of Coding "JAVA PROGRAMMING" Batch II in connection with HRLytics, Bengaluru for II year CSE and II year ADS students from 12-02-2024 to 17-02-2024. Resource person Mr.S.Sasidharan Software Trainer, HRLytics, Bengaluru has handled the sessions both practical as well as theory.

The resource person conducted the course in interactive manner. He addressed that the course to emphasize developing and solving scenario based online problems using the JAVA programming with company login credentials. The six days programme was really useful session to enhance coding skills through JAVA programming.

Programming Fundamentals, oops using Java, Basic Elements of Java were demonstrated and online environment portal practiced on Day 1. OOPS, Classes, Methods and Packages were discussed on Day 2. Inheritance & Interfaces were explained with real world examples on Day 3. Collections & Inner class were discussed in detailed manner on Day 4. Collections and Generic methods were explained on Day 5. Exception Handling and multithreading were demonstrated on Day 6. An assessment was conducted on Day 6 with specially designed test login for 2 hours. All six days the students solved 10 to 15 scenario based problems using the portal.. Students feedback was collected for all the six days and they have felt it was an informative session. Overall the Value added Course was gone well and it helps to enhance the insights into coding skills in JAVA Programming. The Students assured continue the problem solving practices using the portal.
